

## GLEWS<sup>+</sup> TRIPARTITE PRIORITY DISEASES CRITERIA

July 2022

---

For each disease category a new specific criteria to post information have been drafted:

### **Group 1: Global tripartite priority diseases with high impact on animal and/or human health**

1. *Active sharing of any relevant signals and information (documents) regarding the tripartite priority diseases.*
2. *Request of information for event verification when:*
  1. *First occurrence or recurrence of an event:*
    - a) *Unusual phenomenon for the area or season,*
    - b) *Event associated with an unknown hazard,*
    - c) *New host or new vector able to transmit disease;*
  2. *Emerging threat with significant human or animal mortality or morbidity;*
  3. *Potential for national, regional or global spread and/or potential impact on international travel or trade.*

### **Group 2: Diseases with high impact on human and low impact on animal health**

1. *Sharing any relevant signals for information*
2. *Request of additional information/verification for potential high impact on human and animal health*
3. *Diseases with a potential bioterrorism use*

### **Group 3: Diseases with high impact on public health in outbreak situation**

1. *Sharing signals of unusual/unexpected disease pattern (i.e. outbreaks, seasonal or geographical changes etc.)*
